

Corning® EcoChoice™ Products

Supply Your Lab. Sustainably.

CORNING

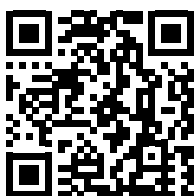

Corning Life Sciences' EcoChoice products are designed with a focus on reducing environmental impact throughout their lifecycle. From the materials used to the manufacturing processes employed, every aspect is carefully considered to minimize resource consumption and waste generation. Corning EcoChoice products are produced, packaged, or distributed in an environmentally friendly manner following FTC Guidelines. This means that all product sustainability statements are specific, evidence-based, and traceable.

Corning products included in the Corning EcoChoice program meet one or more of the following criteria:

- ▶ Recycled content (pre-consumer or post-consumer)
- ▶ Source reduction
- ▶ Intensification: products designed to enable greater cell production in a smaller footprint, resulting in less plastic per unit of output
- ▶ Manufactured using Renewable energy certifications/RECs

You can identify Corning EcoChoice products by looking for the green leaf symbol in our e-catalog.
