

SLS Announce Partnership with Novacyt to Enhance PCR Workflow Product Portfolio

Scientific Laboratory Supplies Ltd (SLS) is delighted to announce an exciting new distribution partnership with Novacyt. Novacyt is the parent company of; PrimerDesign Ltd and IT-IS International. This collaboration allows SLS to offer a diverse range of market-leading brands, including genesig™ PCR reagents and mastermixes, Pathflow™ Lateral flow tests and MyGo™ Instruments, to enhance their comprehensive PCR workflow product portfolio.

Novacyt's product range encompasses end-to-end products and solutions for the PCR workflow, such as extraction chemistry and instrumentation, PCR detection kits for pathogens detected in food testing, veterinary applications as well as personal-sized PCR cyclers and automated fluid handling. By incorporating these cutting-edge solutions into their offerings, SLS aims to provide customers with an extensive selection of suppliers and products that greatly facilitate research and development in laboratory settings.

By partnering with Novacyt, SLS further strengthens its position as the foremost independent laboratory supplier in the UK. SLS remains dedicated to delivering unrivalled support to its customers, ensuring they have access to state-of-the-art scientific tools and technologies.
