

SOLSTICE RESEARCH CHEMICALS

HIGH-PURITY CHEMICALS FOR HIGH-QUALITY LABS

Backed by decades of proven process excellence, an expert support team who understands your chemistry, and a legacy that labs around the world trust, each of our products delivers **industry-leading performance today — so you can drive the science that shapes tomorrow.**

HYDRANAL™

THE GLOBAL BENCHMARK FOR KARL FISCHER (KF) TITRATION

KF reagents, water standards, auxiliaries

Decades ago, we pioneered the original pyridine-free and alcohol-free KF reagents. Today, our world-class chemists continue to innovate to meet every titration need. Our volumetric and coulometric reagents, certified water standards, and auxiliaries ensure reliable moisture determination across every application. When accuracy is non-negotiable, scientists trust Hydranal™.

CHROMASOLV™

THE CLEAR CHOICE FOR CHROMATOGRAPHY SOLVENTS

LC-MS, HPLC, UHPLC-MS, GC solvents

Our globally trusted solvents are synonymous with purity and reliability. Each is manufactured to the highest standards of quality and consistency, supporting precise, reproducible separations across every chromatography application. Built on a century-long legacy of chemical innovation by Burdick & Jackson™ and Riedel-de Haën, Chromasolv™ enables the clarity scientists depend on.

FLUKA™

DEPENDABILITY IN A BOTTLE FOR EVERY ANALYTICAL NEED

Analytical acids, bases, buffers, salts, solvents

Every essential acid, base, buffer, salt, and high-purity solvent in the expansive Fluka™ portfolio is designed to excel at the daily demands of analytical chemistry labs. Manufactured with ISO-certified quality systems, proven across thousands of methods, and used by researchers around the world for generations—Fluka™ is the workhorse scientists trust for reliable results every day.

BURDICK & JACKSON BIOSYN™

EXPERT BLENDS FOR YOUR BIOSYNTHESIS WORKFLOWS

Biosynthesis solvents, reagents

Made to meet your exact requirements, our high-purity solvents and reagents enable reproducible lot-to-lot consistency. Closed-system processing protects against cross-contamination, while sustainable packaging engineered for biopharma environments preserves product integrity from bench to production. For high-quality biosynthesis at any scale, scientists choose Burdick & Jackson BioSyn™.

SOLSTICE LABREADY:

CUSTOM BLENDS AND SERVICES ACROSS ALL BRANDS
