## HABITAT cell dw 5 double-wall, for 5 l

/// Data Sheet

The 5-liter vessel package for the bioreactor HABITAT research contains a 5-liter double-walled glass vessel for cell culture applications as well as the appropriate stirring drive, including the following sensors: temperature-, pH-, DO-, level- and foam sensors. Additionally, the necessary connection accessories are included. Together with the separately available control tower package (e.g. HABITAT cell) you receive all necessary components for a successful cultivation. For temperature control via the double jacket we recommend one of our circulators such as the HRC 2 basic or control.

#### Scope of delivery

- Stand 5
- HA.gv.dw.5 Glass vessel, double-wall, for 5 l
- HA.mt.s.10 Motor, big, for 5 l and 10 l
- HA.hp.s.5 Harvest pipe, straight, for 5 l
- HA.ino Port for inoculation
- HA.sp.m.5 Micro sparger, for 5 l
- HA.cn.flx flexible condenser
- HA.ip.pi.5 3-pitched blade impeller, for 5 l (2 pcs.)
- HA.s.tm.5 Temperature sensor, for 5 l
- HA.s.ph.5 Hamilton pH sensor, for 5 l
- HA.s.do.5 Hamilton DO analogue sensor, for 5 l
- HA.s.fo Foam sensor
- HA.s.lv.5 Fill level sensor, for 5 l
- HA.cab.dw Cable & tube set, for double-wall vessels
- HA.sf.250 Sample flask, 250 ml (4 pcs.)
